

The GLM Sprint, Exploit Gap Collapse, and Grid Infrastructure

2026-06-21 / 00:14:42

“Opus 4.6 generally had a near-zero percent success rate at autonomous exploit development. Mythos Preview is in a different league.”

— Seln Oriax, today's narration

On today's episode: open-weight models hit their practical coding moment — Vercel pushes AI Gateway docs to route GLM-5.2 through Claude Code hours after release. We unpack Anthropic's Mythos capabilities paper, which documents the gap between "good at patching" and "good at exploiting" collapsing in a single model generation. Plus: Claude starts requiring identity verification via Persona, and second-life EV batteries deploy to real data centers.

CHAPTERS

- 00:00:04 The GLM Sprint
- 00:02:59 The Exploit Gap Collapsed
- 00:06:50 Identity as Infrastructure
- 00:08:45 Near-Term Power
- 00:12:10 The Code Share Trajectory
