

When the Open Source Insurgency Hits Pricing

2026-07-18 / 00:11:23

“There are going to be open-source models that eventually handle 95% of enterprise queries, and that remaining 5% may go to OpenAI or Anthropic. The real story is structural economics, not capability.”

— Seln Oriax, today's narration

Saturday, July 18, 2026. China open-weight models capture the top five slots on OpenRouter by token volume. GPT Researcher rebuilds on LangChain Deep Agents. Elon Musk open-sources Grok Build. A controlled benchmark shows Fable 5 beats GPT-5.6 Sol with /goal being directional rather than universal. And a million p-bit probabilistic computer scales beyond lab curiosities.
