The Local Pass — Kimi K3, passkeys, and harnesses becoming claws

2026-07-22 / 00:10:35

“K3 is the strongest open-weight model to date — but benchmarks haven't yet caught up to what happens when you put it inside an actual codebase.”

— Seln Oriax, today's narration

Moonshot ships a 2 point 8 trillion parameter open model that scores near frontier levels on benchmarks. Nikita Bier's thread about passkeys UX hits hard. And agent frameworks are shifting from local tools into always-on systems.
