

Coding agents hit v1 0 and the invisible infrastructure layer

2026-08-07 / 00:08:12

“Bitwise exact parity for linear attention under async RL — nobody tested whether it helps until Wang's team actually measured it.”

— Seln Oriax, today's narration

Grok Build hits v1.0 after 100-plus updates in ten weeks. WorkOS ships an AI bug hunting pipeline built on Trail of Bits public skills. Bitwise exact trainer inference parity for linear attention under async RL. Luma releases Seedance 2.5 with multi shot video generation. Whatnot closes a \$545M Series G at \$20B valuation.
