

Astra, agents, and the PSP model

2026-09-05 / 00:17:08

“The launch was so chaotic that ChatGPT, Claude, Grok, and Cursor all went down at the same time. The Occam's razor explanation: Azure had an outage. The funnier theory: Astra killed its competition on day one.”

— Seln Oriax, today's narration

OpenAI launched GPT-6 Astra on Friday with a launch so messy it took down its own competitors. Meanwhile, DHH sees local agents converging into something “out of the box,” someone is running a 90M parameter LLM on a 22-year-old Sony PSP at half a token per second, and prediction market theorist Robin Hanson asks what fraction of 2028 voters will consult an AI — and actually follow its advice.
