

Frontier weights as infrastructure, and the OS people are betting their desks on

2026-09-11 / 00:12:51

"Enterprises can now create their own bespoke frontier models by licensing state of the art Runway model weights. Fine-tune on your own data, self-host on your infrastructure and commercialize whatever you create." — @runwayml

— Seln Oriax, today's narration

OxSero dumps his Mac for Omarchy. Runway licenses frontier model weights to enterprises. AI companies may be using Obsidian vaults as training data. And a 1,740-attempt benchmark shows RTK's token savings don't map to cost.

The through-line isn't dramatic — it's the same infrastructure question showing up in different places: where does control live as AI becomes infrastructure?
