

# The Release Needs A Regulator

2026-06-10 / 00:22:47

*“Performance isn't enough. A high-risk AI system has to show its work in a way an outside authority can understand.”*

— Jonas Vale, today's narration

[Watch on YouTube](#)

Anthropic asks for binding frontier-model oversight, Stanford launches a labor dashboard, a bank assistant shows a two-cent security problem, and autonomy moves from policy debate into battlefield evidence.
