

The Access List Became The Product

2026-06-27 / 00:23:20

“A society may need model access rules. It also needs action rules, evidence rules, and a public way to know which kind of rule is being used.”

— Jonas Vale, today's narration

Watch on YouTube

Jonas follows the partial return of Anthropic Mythos 5, the uncertain path back for Fable 5, Asian model launches that exploit the access gap, and the physical supply chain behind AI: turbines, chip packaging, and memory politics. Then he turns to agent governance, security research, and healthcare chatbots as evidence problems rather than product demos.
